

1. Create a user in Keycloak

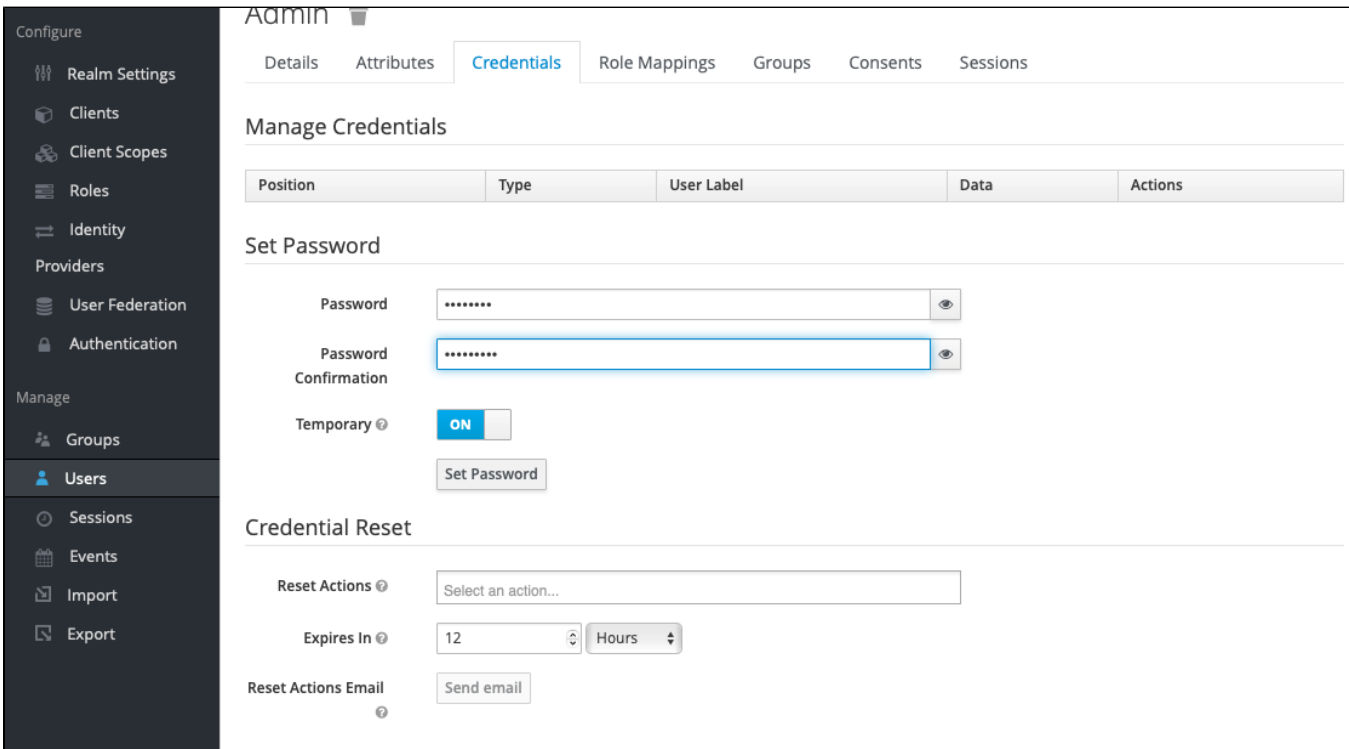

Open you realm, Select Users and create a new User

For 2 Factor Authentication : e.g. Select **Configure OTP** and **Update Password**

The screenshot shows the Keycloak 'Add user' form for the realm '2improveIT'. The form includes fields for ID, Created At, Username (admin), Email (admin@2improveit.eu), First Name (The), and Last Name (Administrator). There are toggle switches for 'User Enabled' (ON) and 'Email Verified' (OFF). A 'Required User Actions' field contains 'Update Password' and 'Configure OTP'. 'Save' and 'Cancel' buttons are at the bottom.

Save the user, select Credentials and create a temporary password

The screenshot shows the 'Manage Credentials' page for the user 'Admin'. The 'Credentials' tab is active. A table with columns 'Position', 'Type', 'User Label', 'Data', and 'Actions' is present. Below the table, the 'Set Password' section has two password input fields (one highlighted), a 'Temporary' toggle (ON), and a 'Set Password' button. The 'Credential Reset' section has a 'Reset Actions' dropdown (Select an action...), an 'Expires In' dropdown (12 Hours), and a 'Reset Actions Email' button (Send email).

The next time the User logs in, he will need to setup OTP and a new password

Mobile Authenticator Setup

⚠ You need to set up Mobile Authenticator to activate your account.

1. Install one of the following applications on your mobile:
FreeOTP
Google Authenticator
2. Open the application and scan the barcode:

[Unable to scan?](#)
3. Enter the one-time code provided by the application and click Submit to finish the setup.
Provide a Device Name to help you manage your OTP devices.

One-time code *

Device Name

2IMPROVEIT

Update password

⚠ You need to change your password to activate your account.
