Configure Azure Active Directory

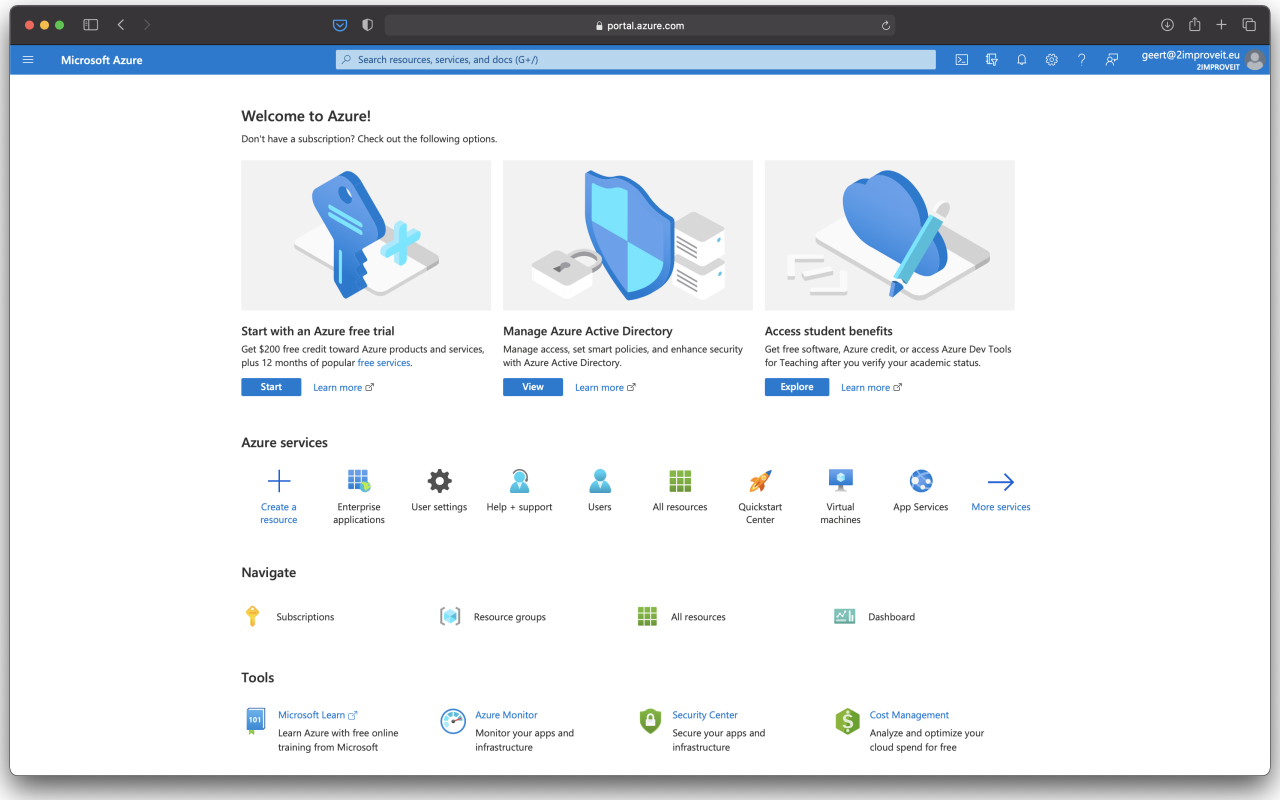

Single Login

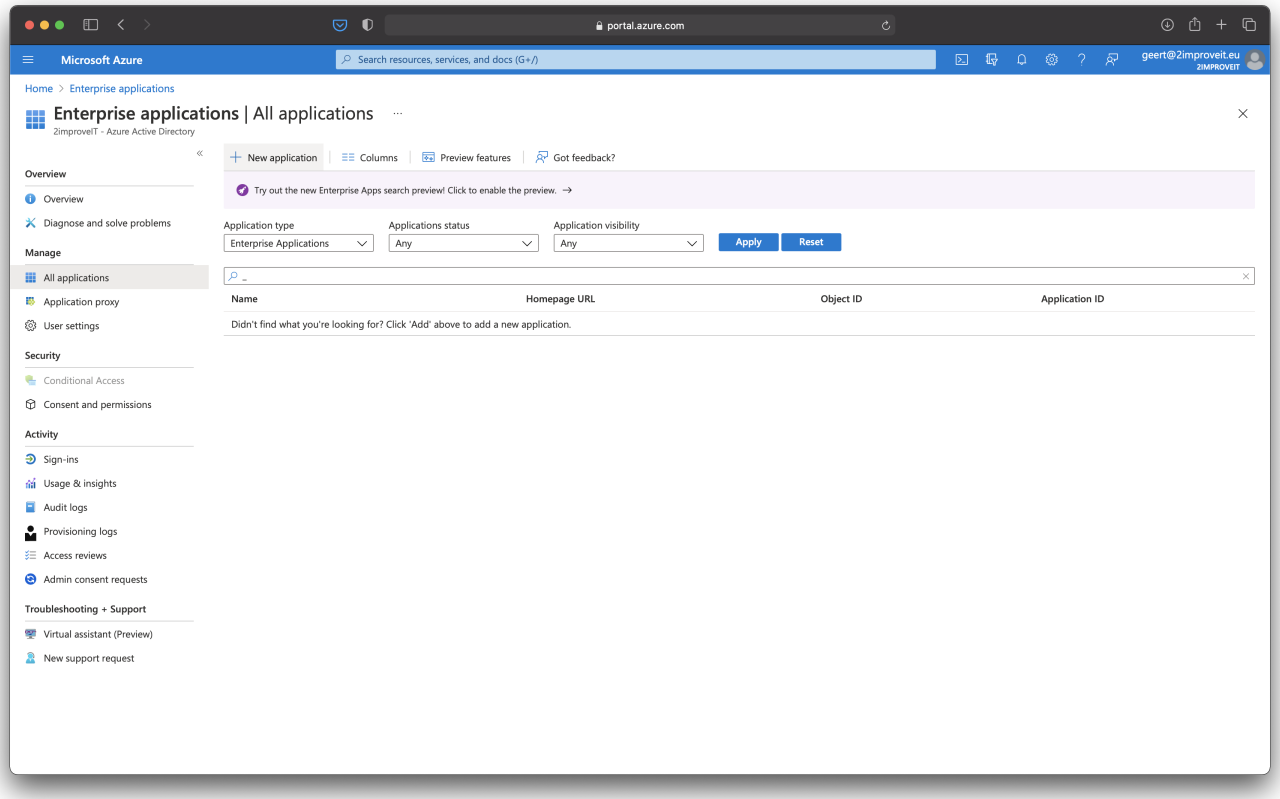

In the SAML plugin configuration, download the "sp xml"

Goto https://portal.azure.com

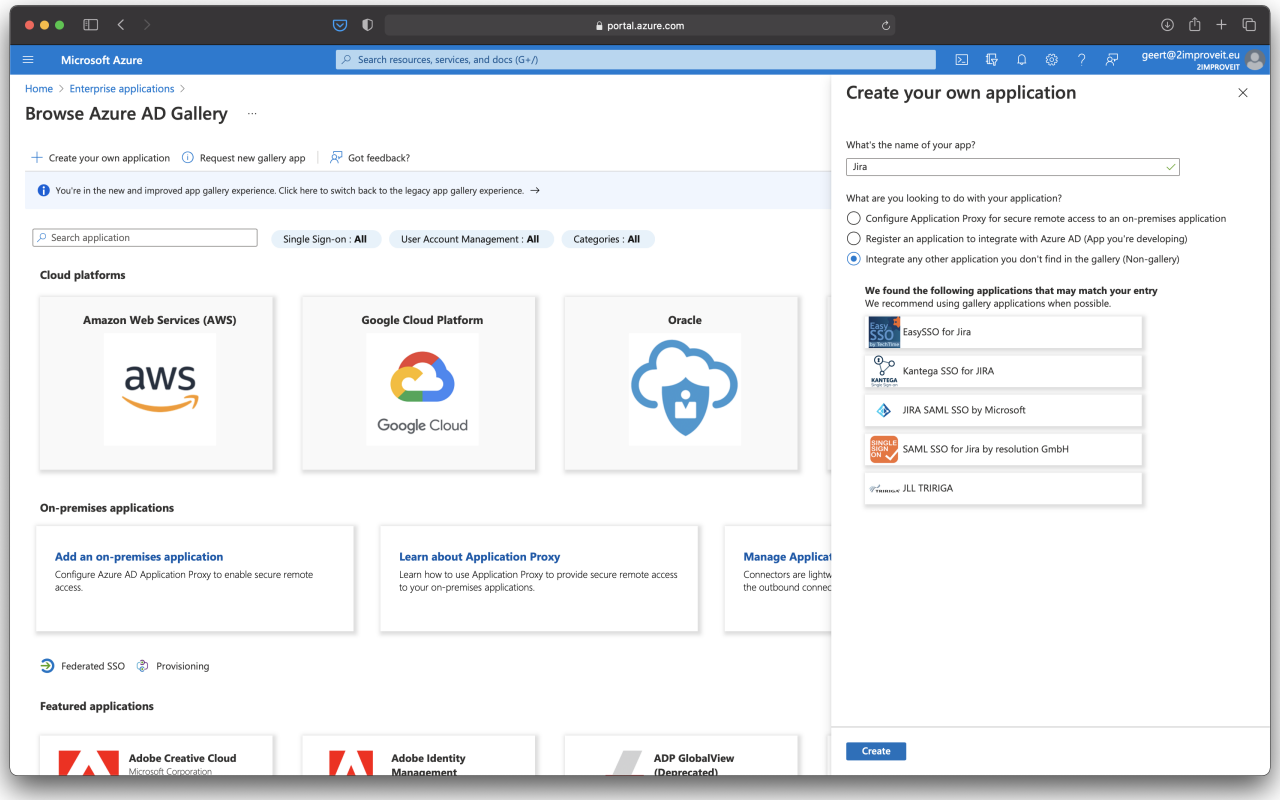

Login and goto "Enterprise Applications"

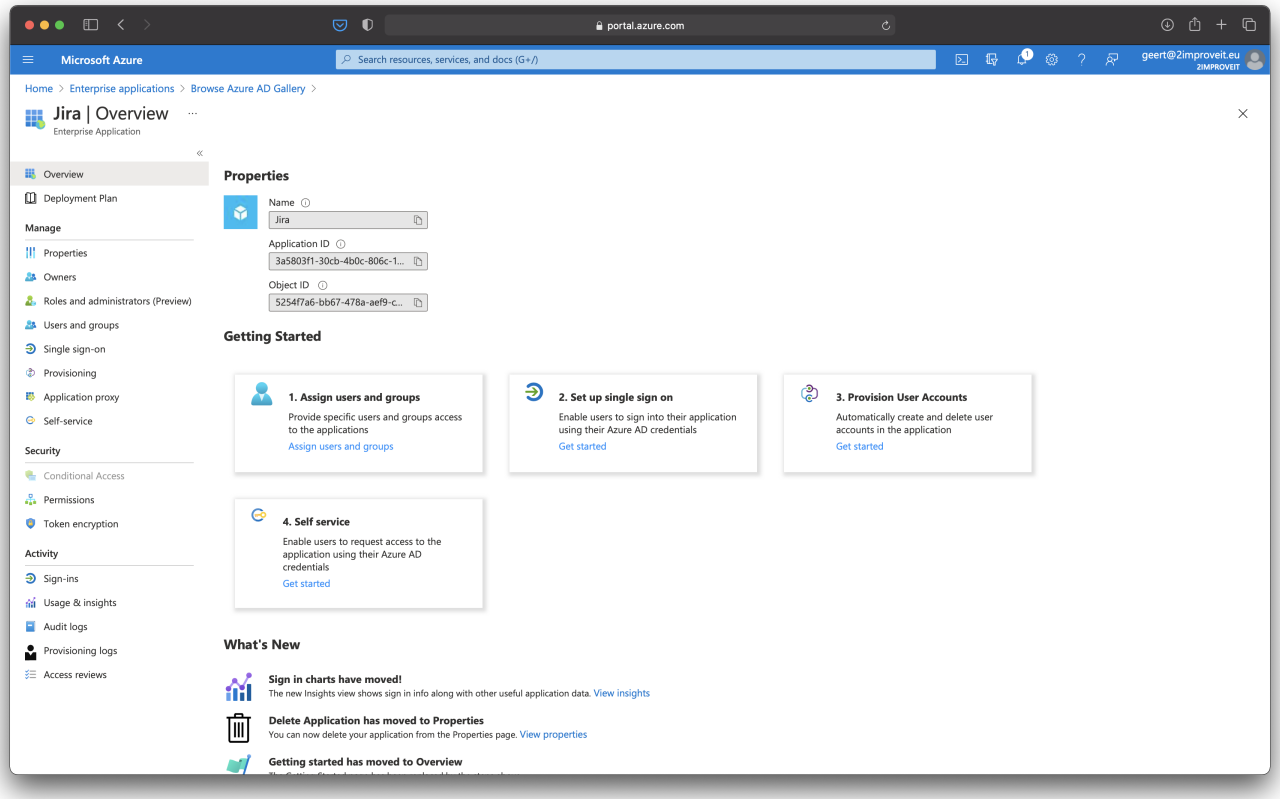

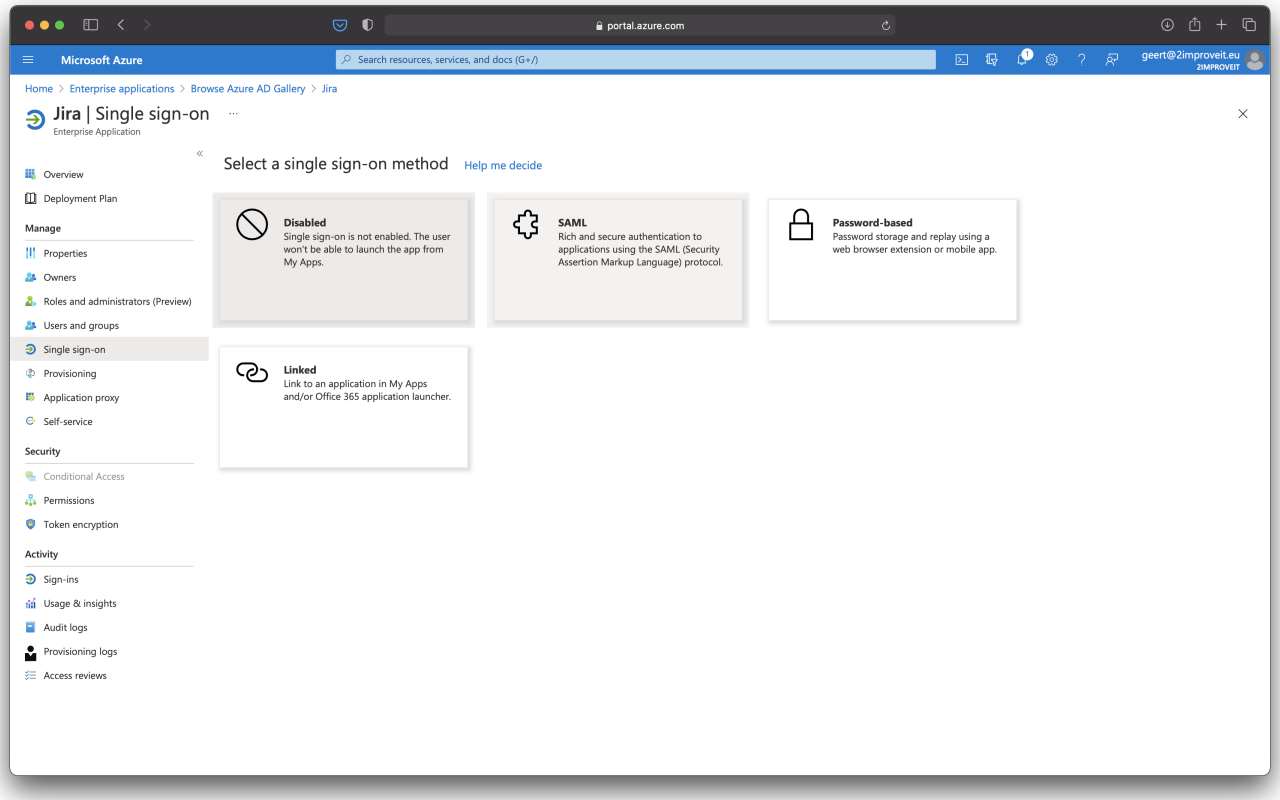

Click "New Application", "Create your own application", enter a name and select "Integrate any other application .. (Non-gallery)."

Click "Create"

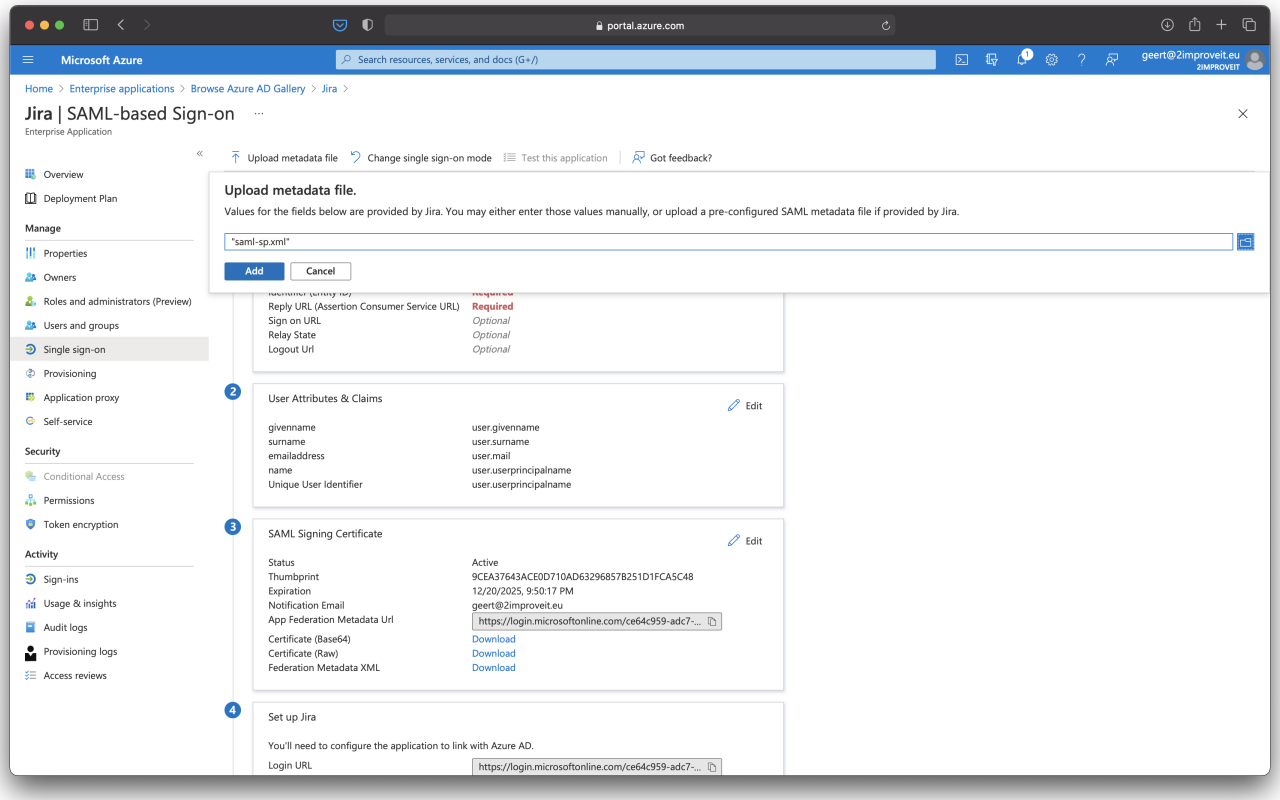

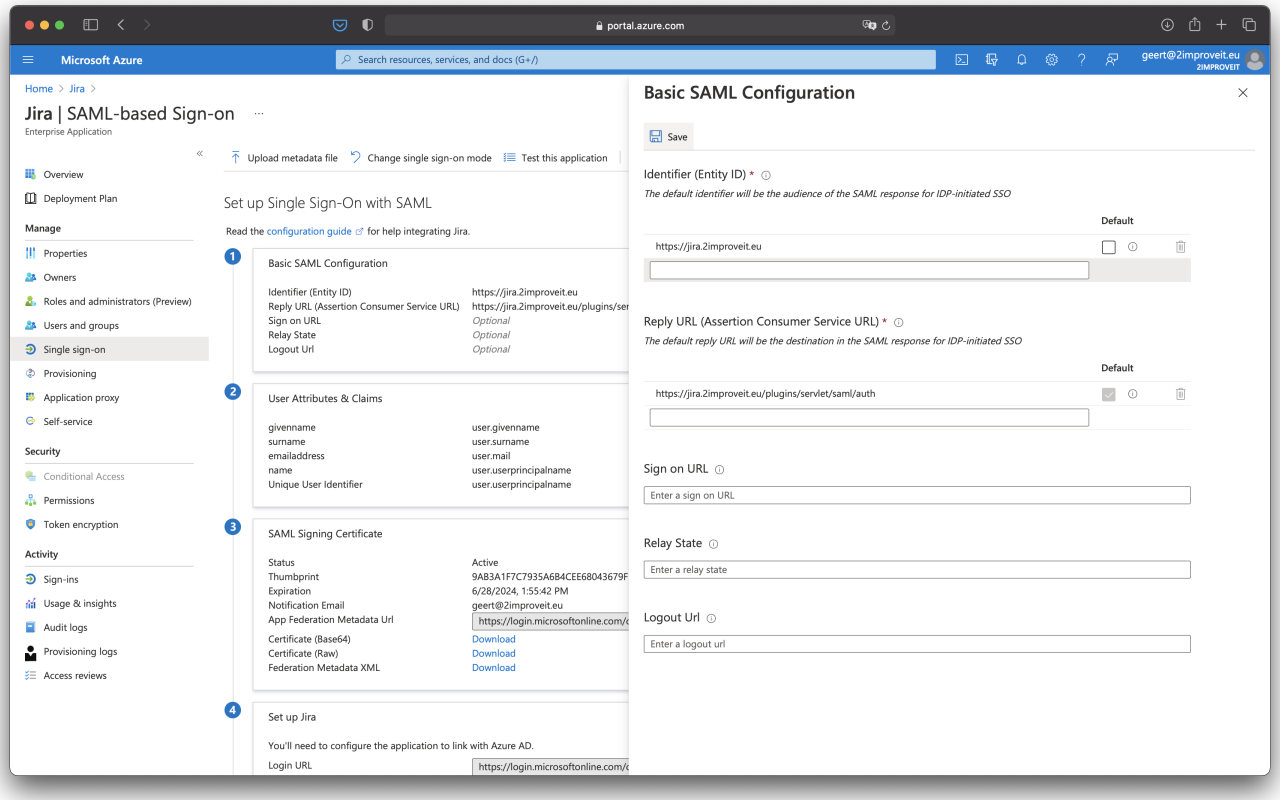

In the left menu. Click "Sing sign-on" and select "SAML".

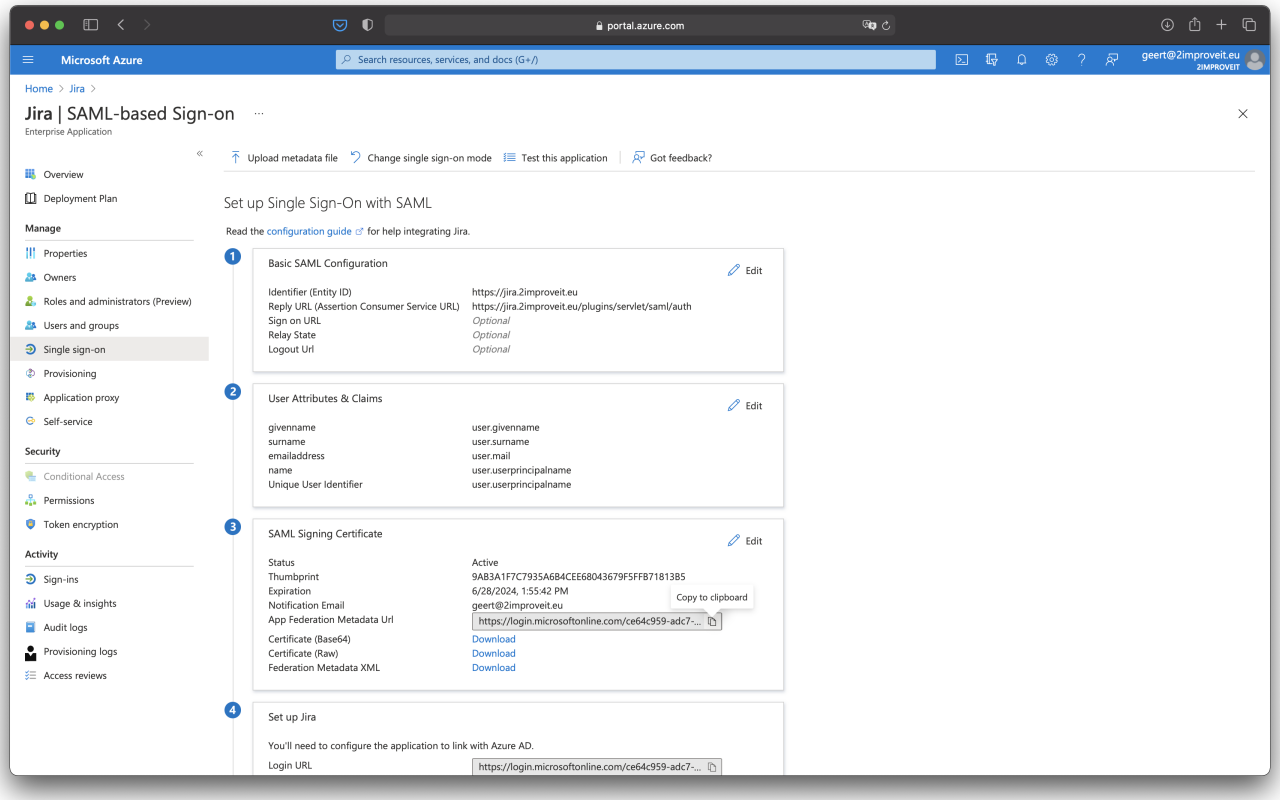

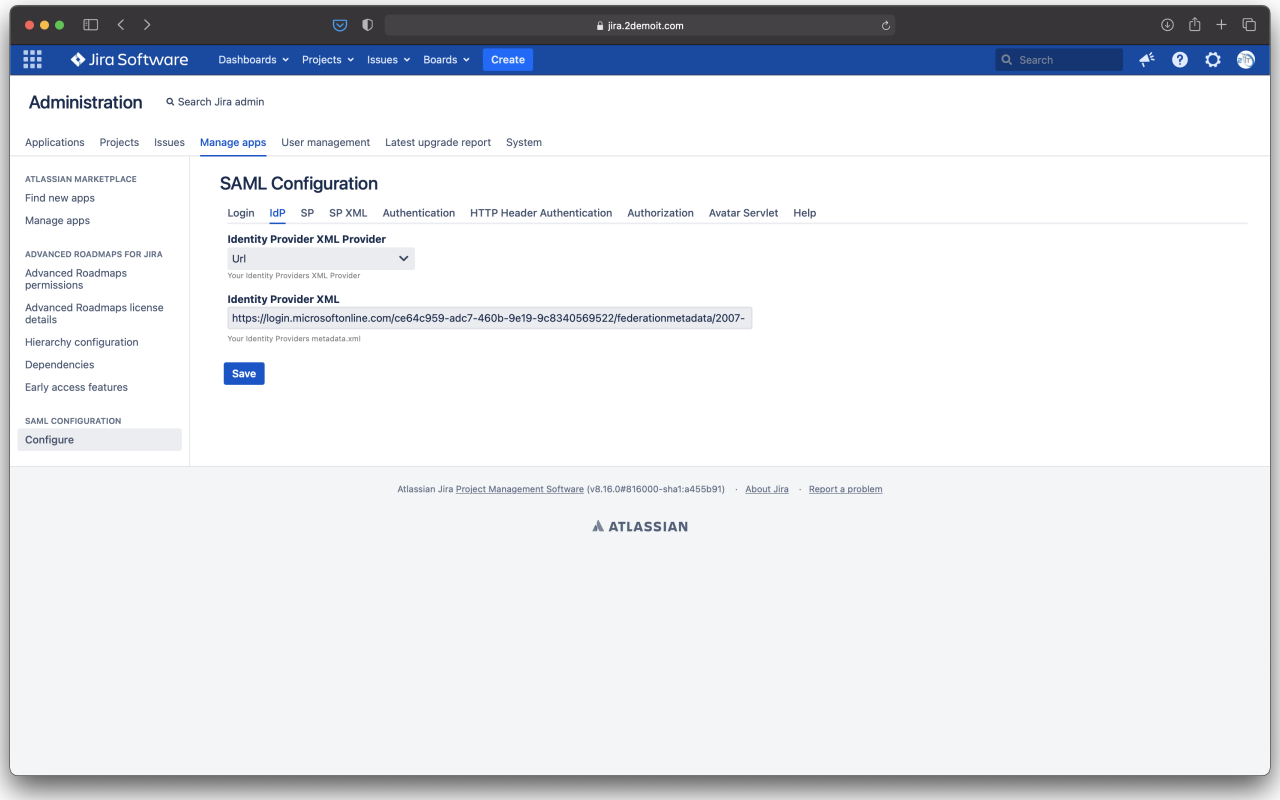

Click "Upload metadata file" and select the "sp xml" file you have downloaded. Click "Add". Click "Save".

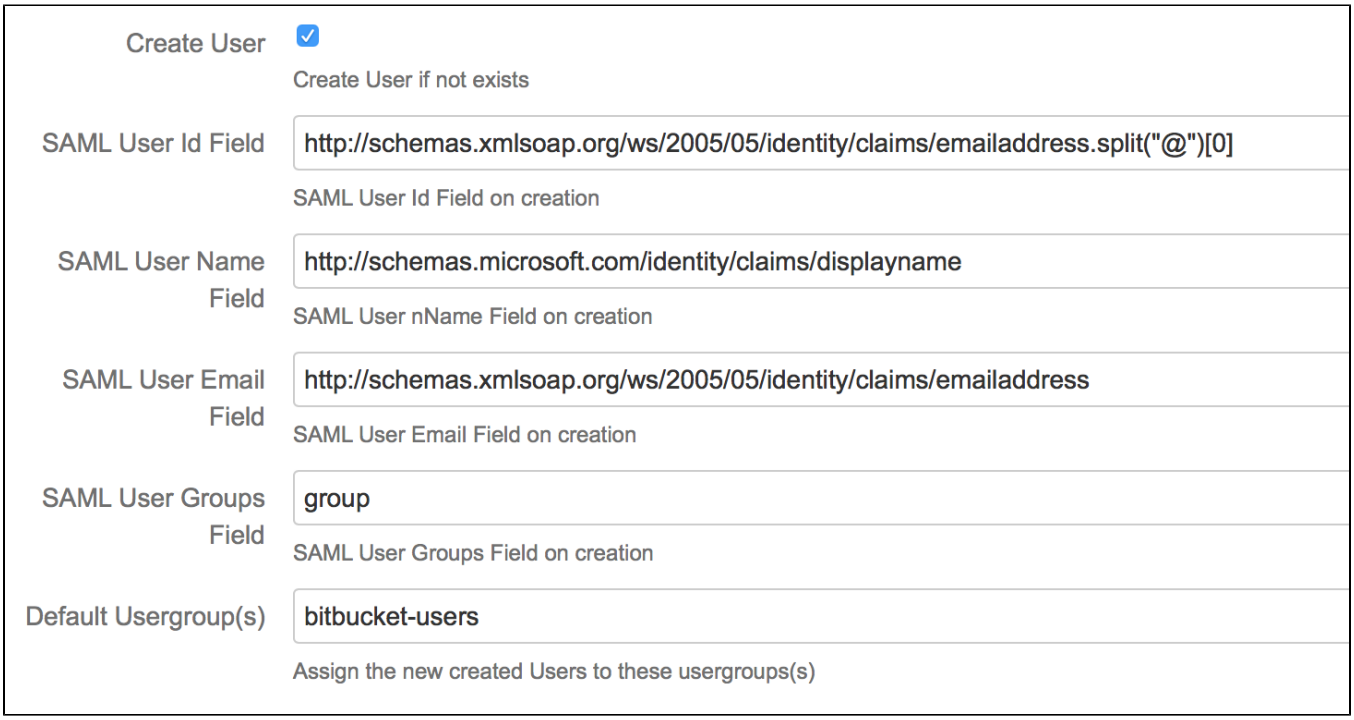

Refresh the "Single sign-on" page. Copy the "App Federation Metadata Url". Go back to the SAML plugin configuration and paste the url in "IdP provider xml" field.

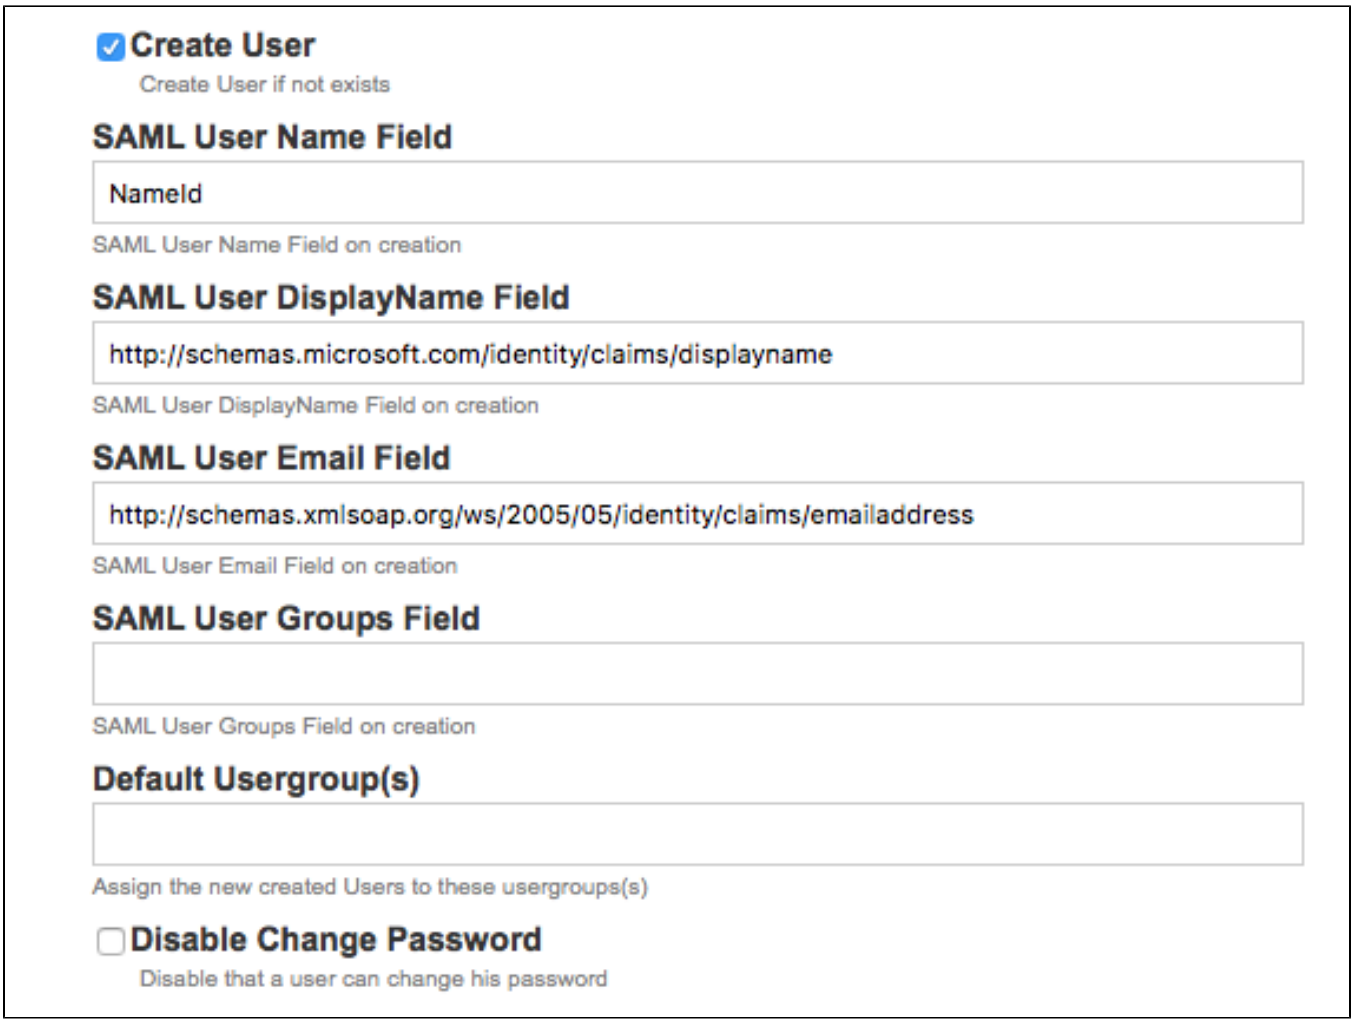

Do not forget to change the **maxAuthenticationAge**

Here is an example how to configure the create User

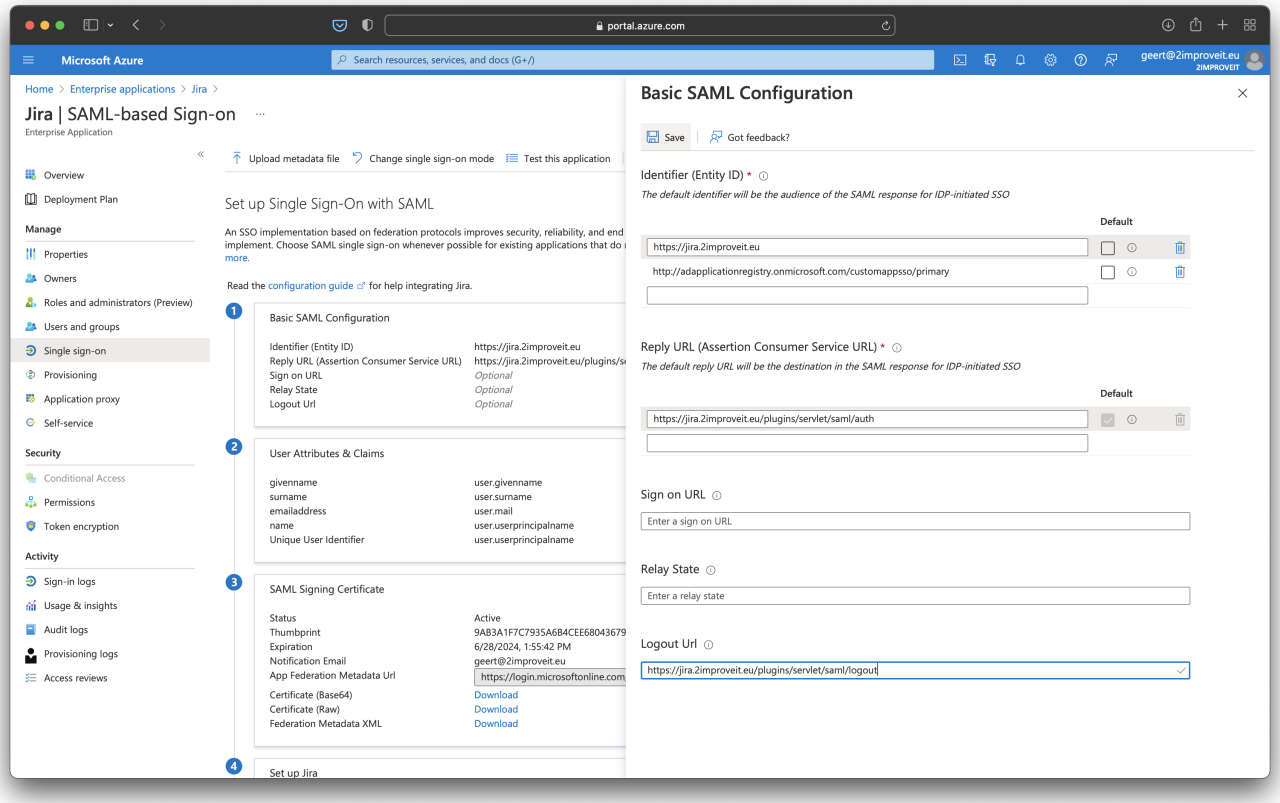

Single Logout

To enable single logout.

- Enter the logout url in your Azure Single Sign-on settings

- And check the "Enable single logout" checkbox in the SAML plugin settings
