Configure Okta

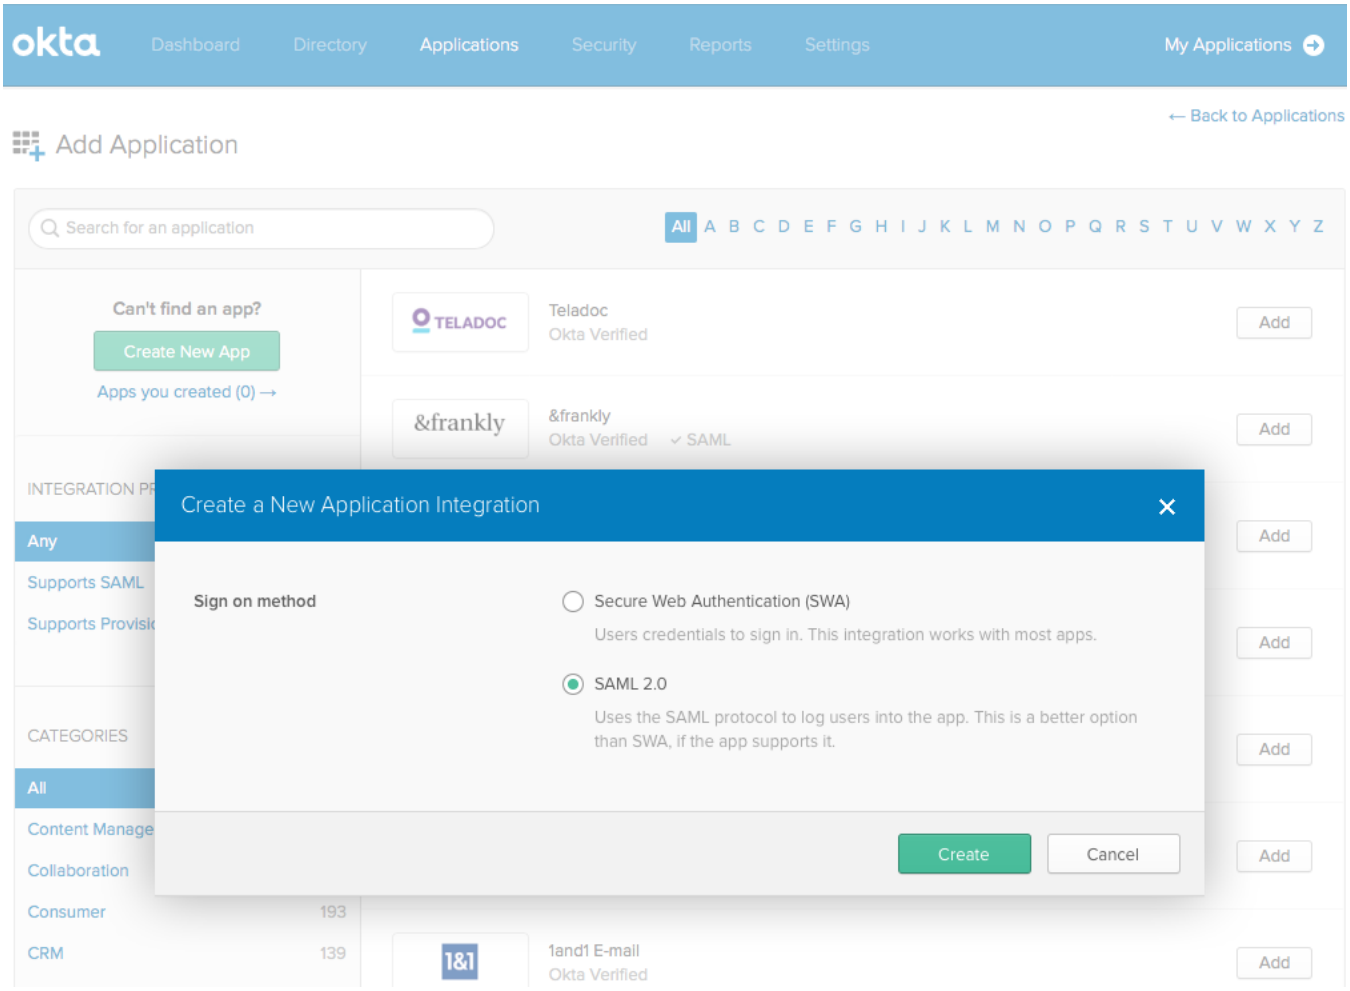

Goto Dashboard

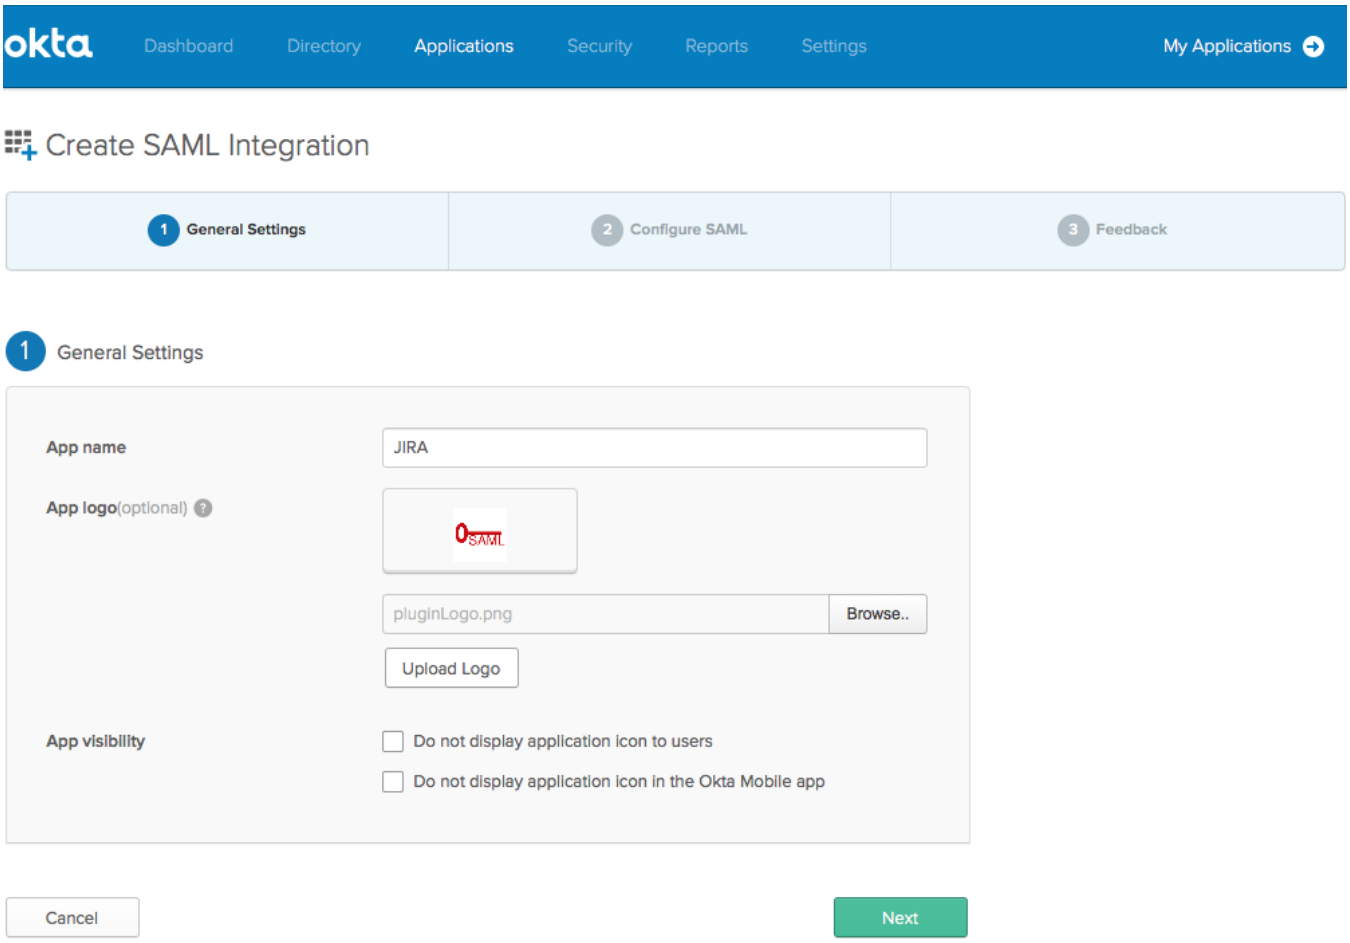

and **Create New App**

Choose **SAML 2.0** as Sign on method

Name it according to the App : e.g. JIRA, and upload a logo for it

Fill in the URL and the SP Entity Id

Create SAML Integration

1 General Settings | 2 Configure SAML | 3 Feedback

A SAML Settings

GENERAL

Single sign on URL http://jira-test.2improveit.eu/plugins/servlet/saml/auth

☑ Use this for Recipient URL and Destination URL

Audience URI (SP Entity ID) http://jira-test.2improveit.eu

Default RelayState

If no value is set, a blank RelayState is sent

Name ID format Unspecified

Application username Okta username

Show Advanced Settings

What does this form do?

This form generates the XML needed for the app's SAML request.

Where do I find the info this form needs?

The app you're trying to integrate with should have its own documentation on using SAML. You'll need to find that doc, and it should outline what information you need to specify in this form.

Okta Certificate

Import the Okta certificate to your Identity Provider if required.

Download Okta Certificate

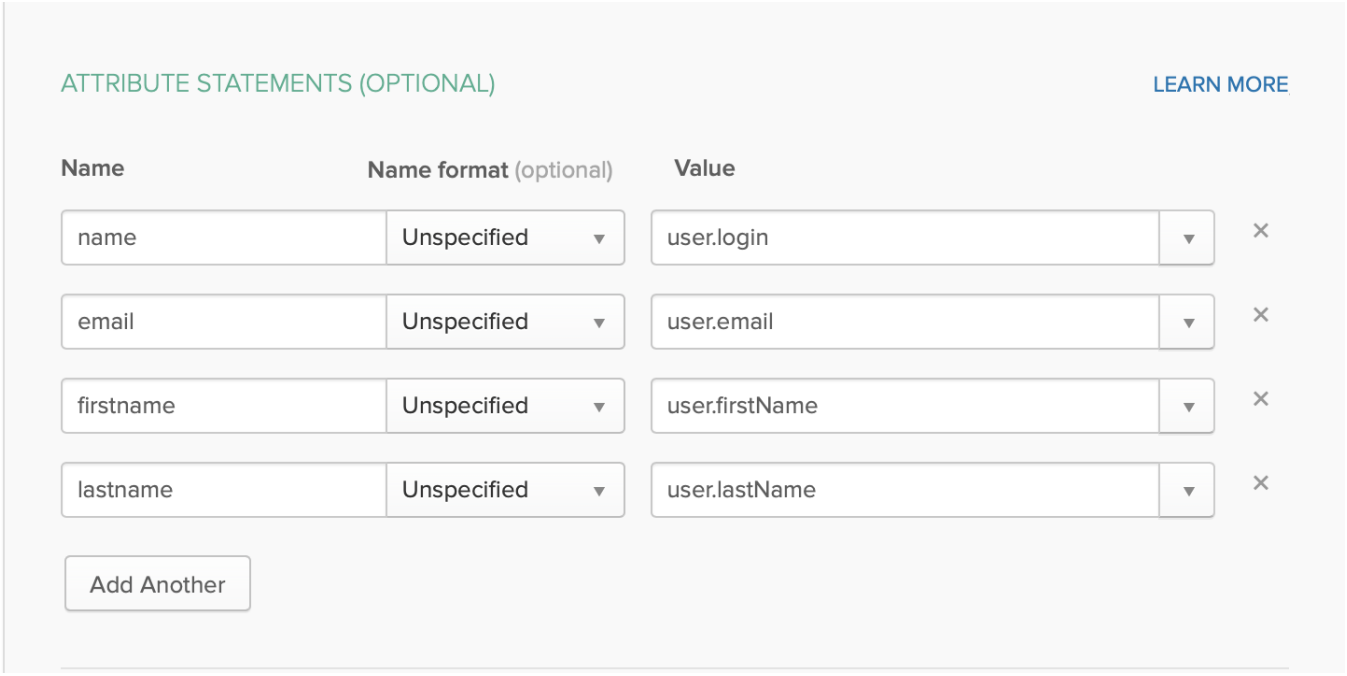

B Preview the SAML assertion generated from the information above

Preview the SAML Assertion

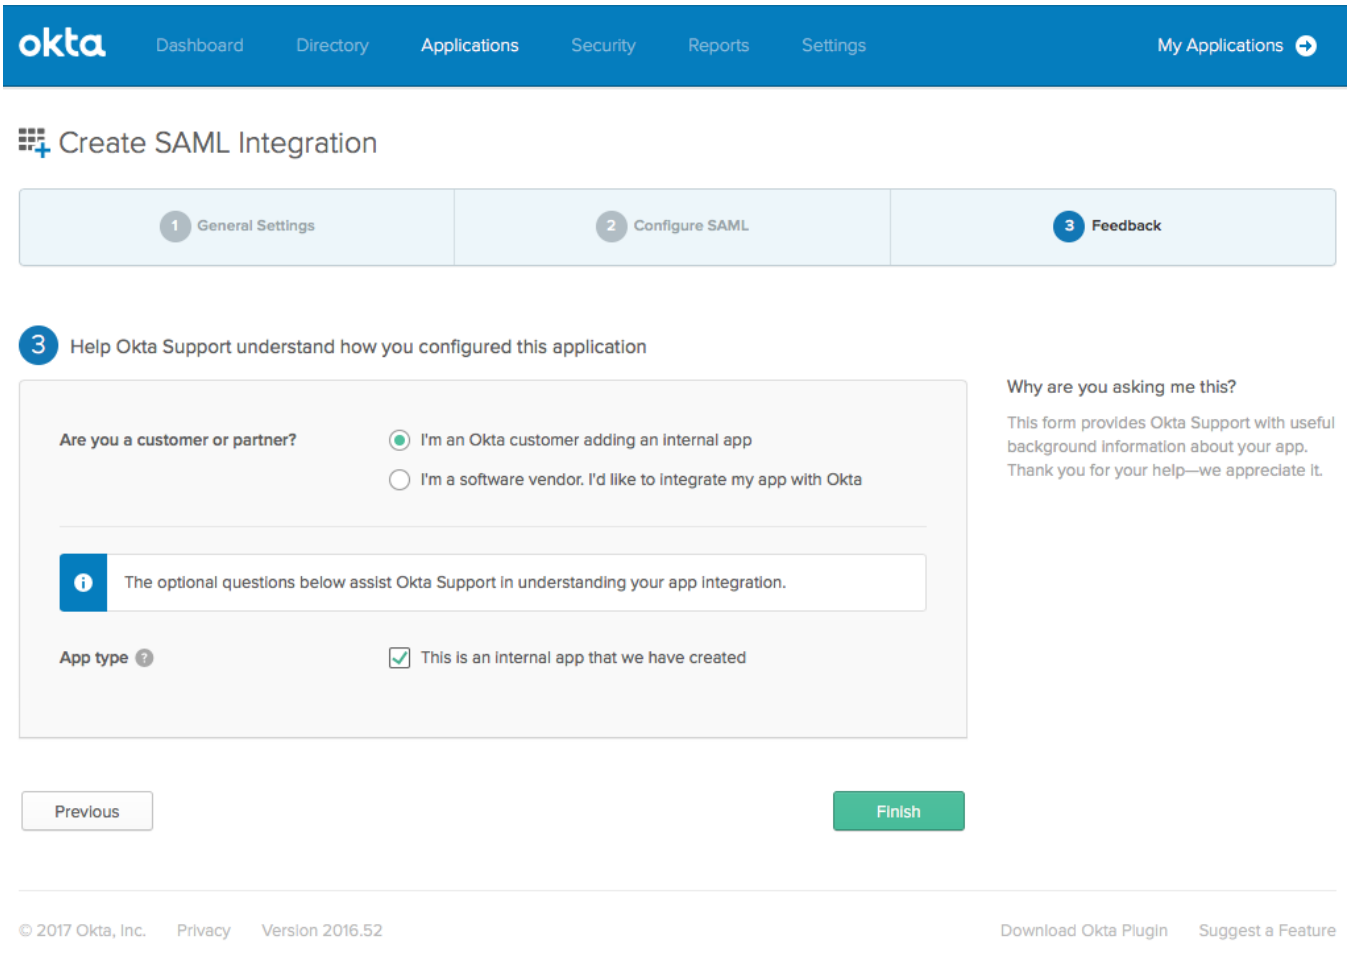

This shows you the XML that will be used in the assertion - use it to verify the info you entered above

Previous | Cancel | Next

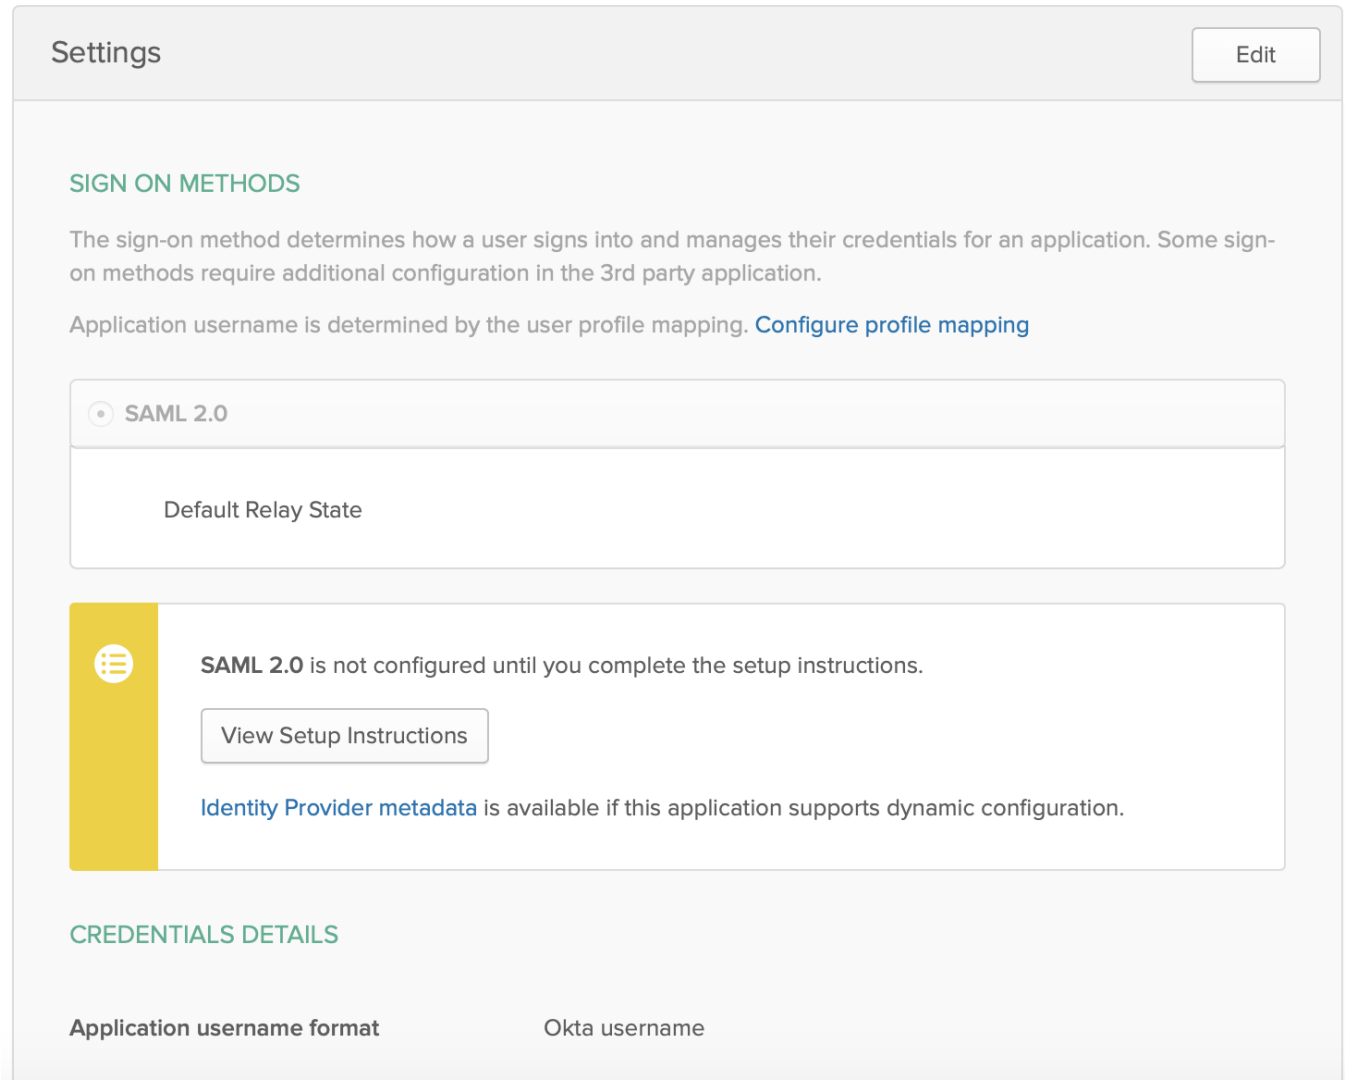

Also fill in the fields for Displayname and email, you need add least have two attributes: **name** and **email** when you want to autocreate the user

Finalise the configuration of the SAML Integration in Octa

Now **View Setup Instructions**

And Scroll Down to the IDP Metadata

Optional

1. Provide the following IDP metadata to your SP provider.

```

Your Identity Providers metadata.xml

SP Entity ID

https://jira-test.2improveit.eu

The EntityID that your plugin will use as ServiceProvider

Max. Authentication Age

172000

The maximum time the system allows users to single sign-on since their initial authentication with the IDP

Force SAML login

If checked, all logins will be made through SAML only. Please test SAML SSO first before checking this box.

Create User

Create User if not exists

Default Usergroup(s)

jira-users

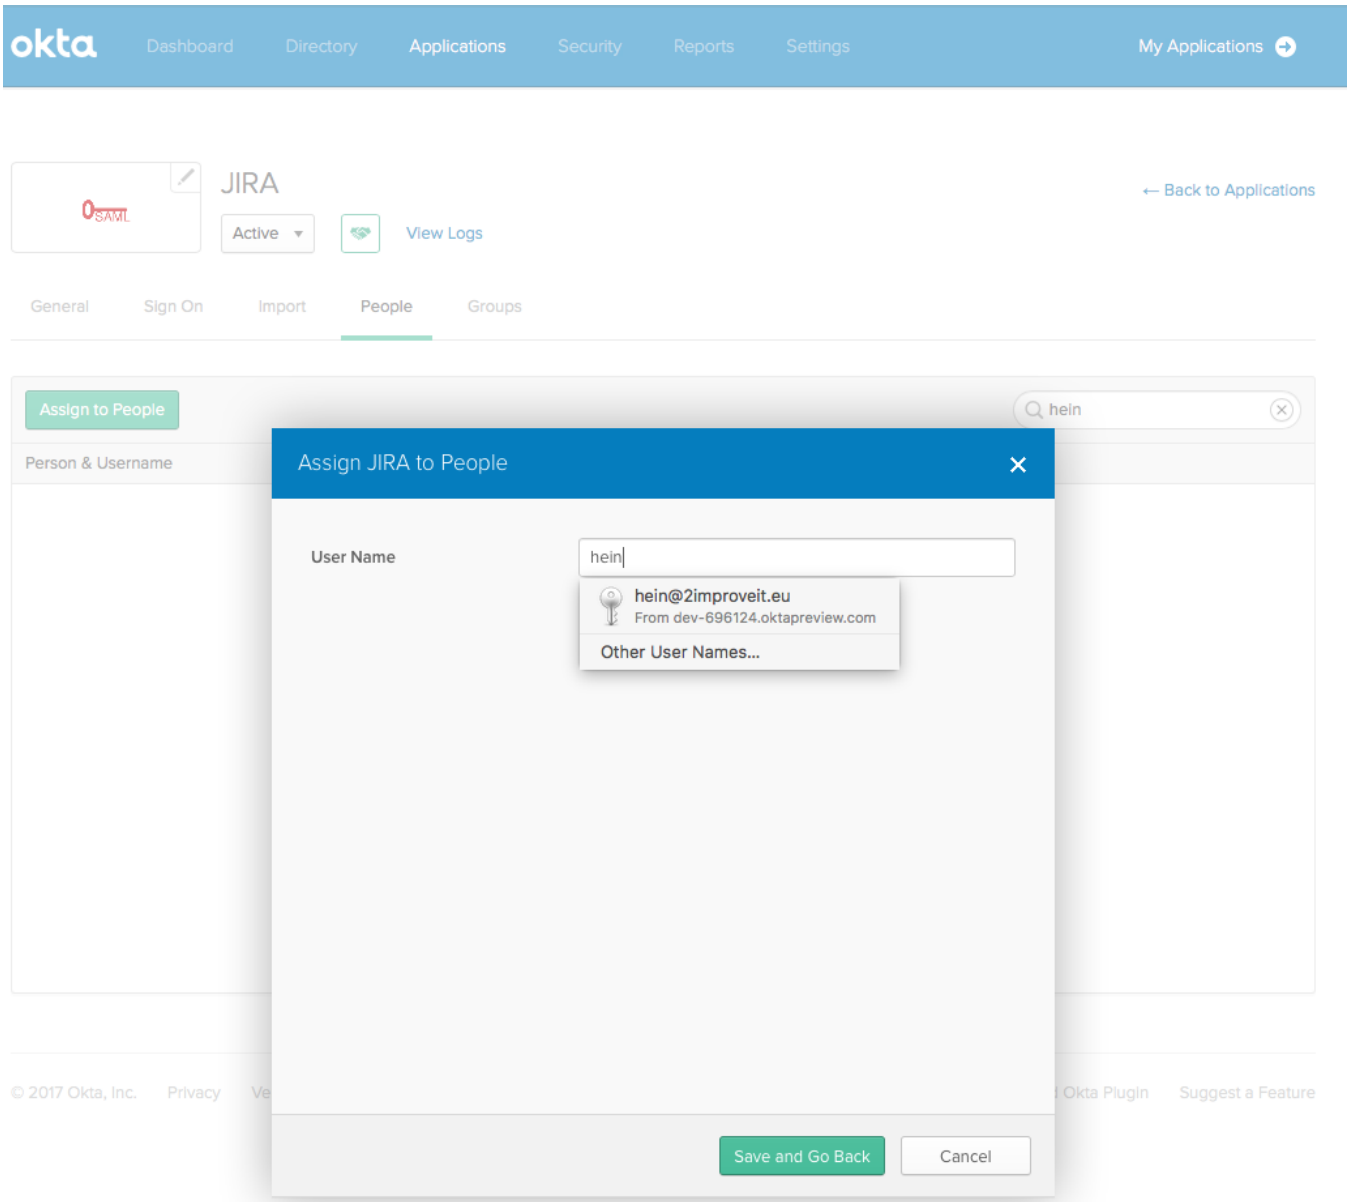

Assign the new created Users to these usergroups(s)

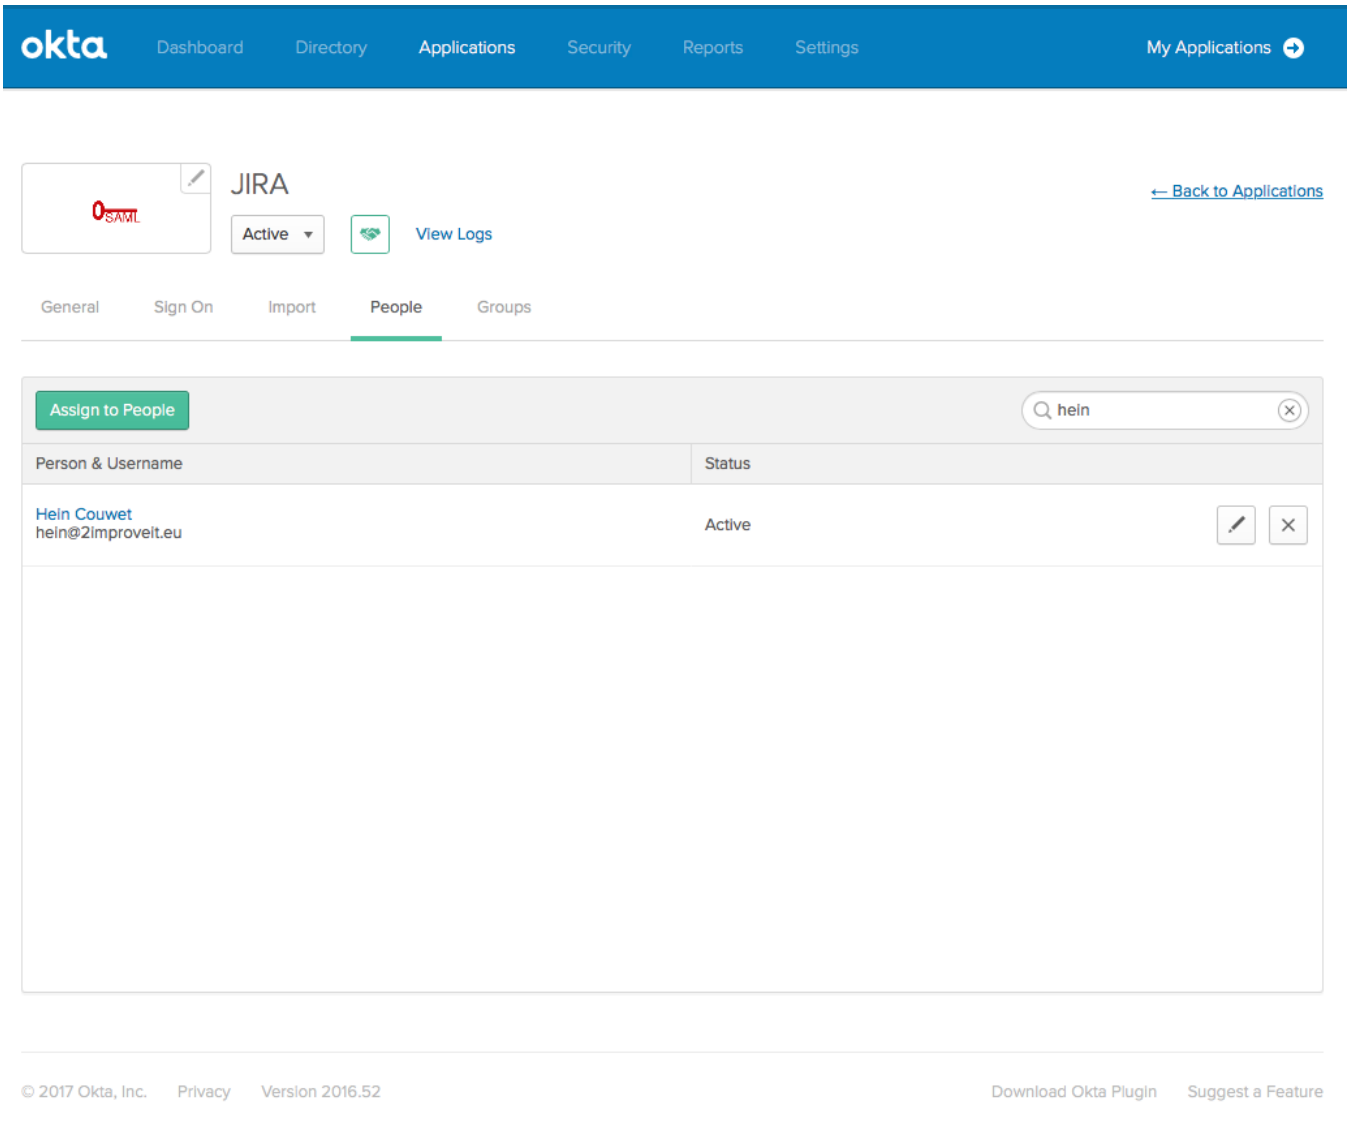

Disable Change Password

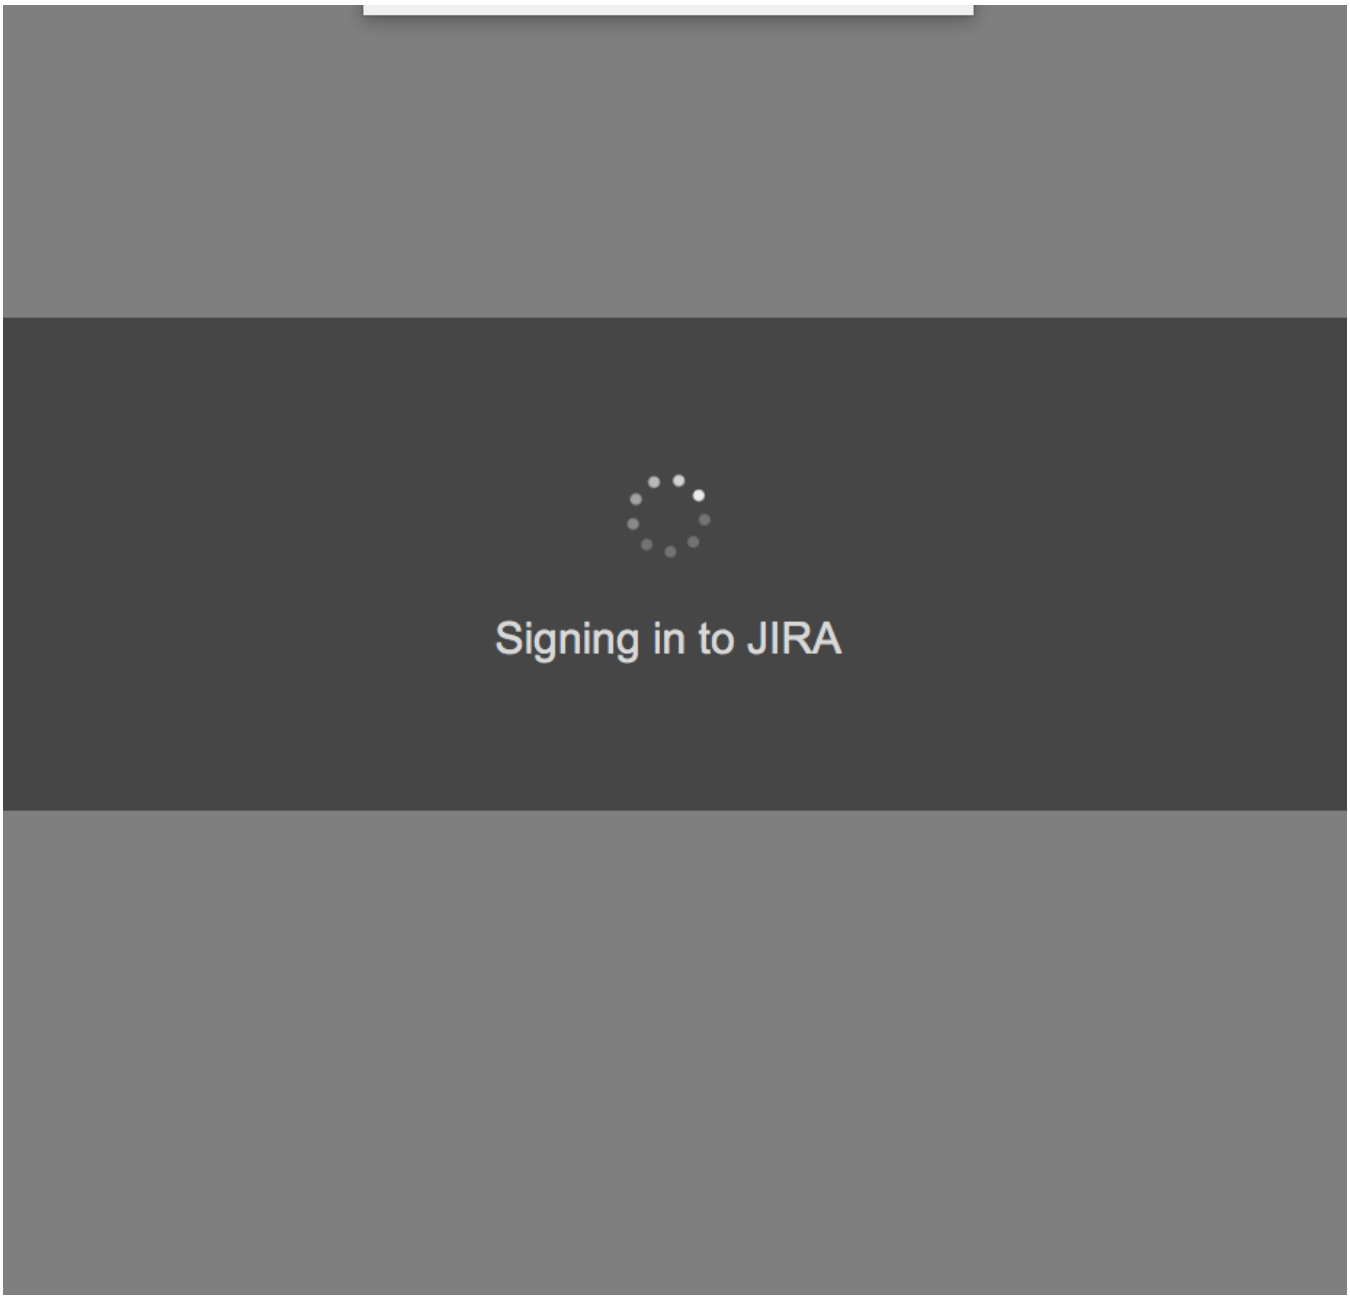

Disable that a user can change his password

Save

You also need to define the people/groups which will have access to this application in Okta
