

1. Create a user in Keycloak

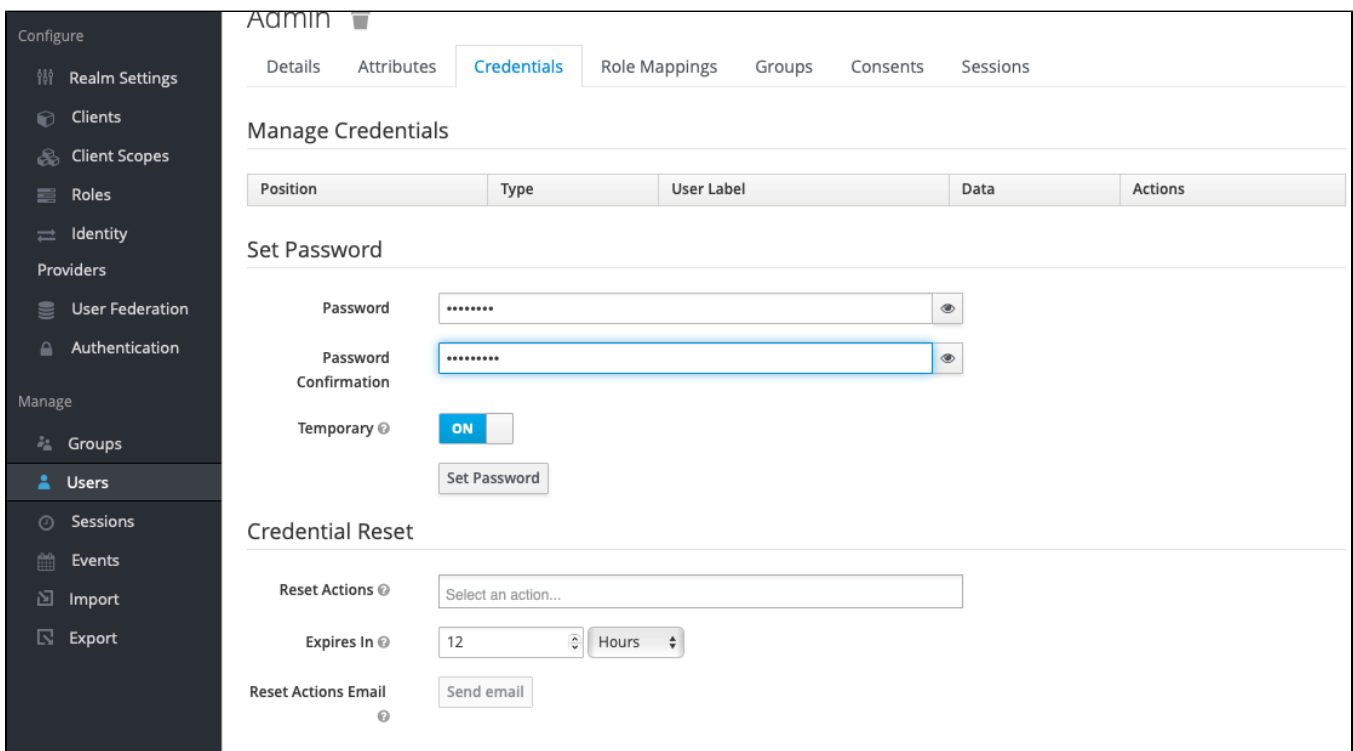

Open you realm, Select Users and create a new User

For 2 Factor Authentication : e.g. Select **Configure OTP** and **Update Password**

The screenshot shows the Keycloak 'Add user' form. The left sidebar contains navigation links for 'Configure' (Realm Settings, Clients, Client Scopes, Roles, Identity, Providers, User Federation, Authentication) and 'Manage' (Groups, Users, Sessions, Events, Import, Export). The 'Users' link is selected. The main area is titled 'Add user' and contains the following fields: ID (empty), Created At (empty), Username (admin), Email (admin@2improveit.eu), First Name (The), Last Name (Administrator), User Enabled (ON), Email Verified (OFF), and Required User Actions (Update Password, Configure OTP). At the bottom are 'Save' and 'Cancel' buttons.

Save the user, select Credentials and create a temporary password

The screenshot shows the Keycloak Admin console 'Credentials' page for the 'Admin' user. The left sidebar is the same as the previous screenshot. The main area has tabs for 'Details', 'Attributes', 'Credentials' (selected), 'Role Mappings', 'Groups', 'Consents', and 'Sessions'. Below the tabs is a 'Manage Credentials' table with columns: Position, Type, User Label, Data, and Actions. The table is empty. Below the table is the 'Set Password' section, which includes fields for Password and Password Confirmation (both masked with dots), a 'Temporary' toggle (ON), and a 'Set Password' button. Below that is the 'Credential Reset' section, which includes a 'Reset Actions' dropdown (Select an action...), an 'Expires In' field (12 Hours), and a 'Reset Actions Email' button (Send email).

The next time the User logs in, he will need to setup OTP and a new password

Mobile Authenticator Setup

 You need to set up Mobile Authenticator to activate your account.

1. Install one of the following applications on your mobile:
FreeOTP
Google Authenticator
2. Open the application and scan the barcode:

[Unable to scan?](#)
3. Enter the one-time code provided by the application and click Submit to finish the setup.
Provide a Device Name to help you manage your OTP devices.
